Revenue in April reached NT\$3,313 million or 5.07% lower than April in 2007, but was up 5% from March in 2008. Annual accumulated revenue from Jan. through April in 2008 totaled NT\$ 12,845 million, down 0.22% from the same period in 2007.

Digital Consumer Electronics

Revenues came from Digital Consumer business primarily, representing 46.63% of revenues, which rose 7.32% from last month. Due to terminating losing projects in 2008, the sales in April dropped 2.46% YoY and the annual accumulated revenue was down 3.39% YoY; however, gross margin improved with the sales decline.

Wire and Cable

Sales in Wire and Cable represented 20.56% of the overall sales. Wire and Cable business tends to grow stably. Revenue in April was up 0.46% on a month-to-month basis. However, it dropped 14.95% YoY, due to the fact that there was one shot order at NT\$101 million last year which did not repeat in April 2008. If we exclude this special order, the sales in April 2008 would be similar to that of April 2007.

Industrial Appliances

Industrial Appliances was about 19.56% of the total sales. Sales in Industrial Appliances rose 6.40% from March and 6.97% from April 2007. The annual accumulated revenue was up 1.30% from the same period a year ago.

Home Appliances

Home Appliances accounted 13.21% of the revenue. Sales in April declined 12.19% from the same period last year, due to the fact that TATUNG Vietnam factory production ramping was not as smooth as expected. We expect production volume to start improving from May on, which should allow Home Appliance BU to increase sales. As for the annual accumulated sales, revenue increased 3.27% on a year-to-year basis.
